RE: Mechanical Lippage Tuning System

The use of the [Mechanical Lippage Tuning System](#) (MLT) is approved for use with Custom Building Products Installation Systems. The MLT System helps reduce or eliminates lippage when used installing large format tile or stone. It also reduces the time it takes to set tile and gauge flatness from one tile to the next.

When using the MLT System with Custom installation products please follow all instructions closely and refer to technical datasheets for additional information.

For best results to install tile or stone, Custom Building Products recommends the following mortars:

- [MegaLite® Crack Prevention Mortar](#) or [MegaLite® Rapid Setting Crack Prevention Mortar](#)
- [ProLite® Tile & Stone Mortar](#) or [ProLite® Rapid Setting Tile & Stone Mortar](#)
- [Complete Contact™ Fortified Mortar](#) or [Complete Contact™ RS Fortified Mortar](#)
- [Marble, Granite & Travertine Premium Medium Bed Mortar](#)

The above products are included in the Custom Building Products System Warranty Program that covers labor and material replacement. For additional information please contact us at (800) 282-8786 or visit our website at www.custombuildingproducts.com.

Best Regards,
